

1990, □ 1

CONTENTS

Electrodynamics of Electric Power Devices

DVOINYKH E.V. Invariant Conditions for Functioning of Three-Level Electromechanical

Converter to the Position of
Rotor_____ 3

BATYGIN Yu.V., DEMIDOVA S.A., KHIMENKO LT. Analytical Integration of the Field Equation

in Moving Thin-Walled
Conductor_____9

VIROVTSEV V.Yu., KAZAKEVICH O.Ya., NALETOV V.V., PETRENKO S.D., SIMONENKO
L.S.

Study of Near-Electrode Processes in the Induced and Applied Electric Fields Under Flow of

Weakly Ionized
Plasma_____ 15

ZAMIDRA A.I. Toroidal Systems with Force-Free Current Distribution_____ 19

PODOLTSEV A.D. To What Velocity Can Electric-Conducting Body Be Heated in

the Running Magnetic Field Without Fusion of Its
Surface_____ 25

BEDYUKH A.R., LADIKOVA-ROEVA I.F., PARUBOCHA T.V. Heating and Introduced
Resistance

of Moving Steel Cylinder in
High-Frequency-Heater_____ 29

BOIKO Yu.D., LISITCHENKO V.V. Effect of Nonequilibrium Effects on Distribution of Electron

Concentration in Plasma of
MHD-Channel_____ 34

BURDAK A.P., KOLOSOK T.N., KUZNETSOVA A.A. Peculiarities of Heterogeneous

Distribution of Electric Fields in Conducting Media with the Presence of Potential Jump

at the Boundary
Interface_____ 38

Transformation of Electric Power Parameters

RUDENKO V.S., LEVIN A.A. Calculation of Steady Reaction of Linear Circuit on the Action of

Width-Modulated Signal_____ 42

KOCHKIN V.I., OBYAZUEV A.P. Starting Regimes of Dependent Voltage Converter _____ 45

PAVELKO A.N. Adaptive Shaper of Pulse Current for Technological Units of Dispersion of Current-

Conducting Materials _____ 49

SAKKOS T.Yu, SAKKOS Kh.A. Two-Phase-Controlable Three-Phase Multipulse

Converters of Variable Voltage _____ 57

PUZAKOV A.V., OSTAPCHUK T.B. Application of the «Predicator-Corrector» Method When

Calculating Electromagnetic Processes in Rectifier
Converters _____ 62

NAZARENKO A.V., GANDUR A., BATRAK L.N. Increase of Static Accuracy of Constant
Voltage

in Pulse
Converters _____ 64

Electromechanical Energy Transformations

KOSTYUK O.M., BANKO S.N. Quasioptimal Control by Excitement of Synchronous Generator in

Transient
Conditions _____ 6
8

VINAKOV A.F, KHERUNTSEV P.E. BABIICHUK O.B. Peculiarities of Quasi-frequency

Control of Asynchronous Uniphase Electric Engines _____
_____ 74

KOLCHANOV A.Ya. Calculation of Nonequilibrium Electromagnetic Field and Its Moment

in Asynchronous Electric Engine with Vertical Rotor Having Hinge and Elastic Supports _____
_____ 77

Electric Power Systems and Installations

FEDOSENKO L.P., DENISENKO O.G., MARGALIK S.V. Problems Concerning Development of

Power Engineering in the Crimea on the Basis of Application of Restorable Energy Sources____
83

DENISENKO N.A., KHOFFMANN I., INSHEKOV E.N. Equivalencing of Electric Loads
in Elements of Electric Power Supply Systems by Condition of Their
Heating_____ 88

Electric and Magnetic Measurements

VOLOSHKO A.V. Minimization of Error in Determination of Electric Consumption

Characteristics Which Is Caused by Deviation of the Network Frequency

94

KARPENKO V.P., MAKARENKO S.V., SURDU M.N., VDOVIN A.A., KOZMENKO V.V.,

PALADIICHUK V.I. Error of Equivalent Resistance in Transformer Measures
_____ 98

NIKITIN Yu.P. Method for Transformation of Electric
Signals_____ 102

Brief Notes

OLEINIKOV A.M., AKSENOV V.F., TITOV V.K., YURGENSON T.S. Asynchronous Engine

with External Two-Layer Rotor_____ 105

RUDYK S.D., KRAVETS E.V., VOROBIEV A.Yu. Unified Series of Network Sources of
Secondary

Electric Supply with Transformer-Free Input_____ 107

Research and Technical Information

BIDA V.V., VASETSKY Yu.M. Application Package for Calculation of Electromagnetic Devices

Containnig Current Wires of Complex Space
Configuration_____ 110

PLUGATAR A.P. Device for the Start of Asynchronous Engine with Phase Rotor_____110

KIRILENKO A.V., KHOLODENKO Yu.N. Microprocessor System for Registration

of Emergency Operation Parameters of Electric-Power
Objects_____93

News Items and Information

On the 60th Anniversary of G.G. Schastlivy, Member of the Ukr. SSR Academy of Sciences_____
111
