

2004, № 5

CONTENTS

Theoretical electrical engineering and electrophysics

GAL'CHENKO V.Ya., VOROBJEV M.A. Structural synthesis of probe fields of eddy-current converters

with prescribed distribution in a control zone _____
_____ 3

TCHERNYSHEV A.V. Forming of asymmetric particular hysteresis cycles at reversal of steel

samples magnetization by a weak alternating field _____

BARANOV M.I. Approximate computation of electric erosion of metal electrodes of high-voltage

heavy current spark
commutators_____ 11

Conversion of electric energy parameters

VOLKOV I.V., GUBAREVICH V.N., SPIRIN V.M., SALKO S.V., GREBENJUK V.G. Methods

of load characteristic correction of rectifier installations with power supply-line
filters_____ 15

KIRIK V.V. Organization of structure of automatic voltage control systems on the basis of
indistinct

logical controller_____
_____ 18

PAVLOVSKY V.O. Connection between parameters of current pulses which is used by a
single-phase

non-controllable diode rectifier with resistive-capacitive load_____

Electromechanical energy conversion

ANTONOV A.E., VELICHKO O.N. Construction of an expectation system of an electric motor

with a three-level
rotor _____ 25

PLAKHTINA O.G., KUTSIK A.S., YOVBAK V.D. Electromagnetic and electromechanical
processes

of an asynchronous motor with a voltage inverter in a rotor circle at vector control _____
_____ 30

CHABAN V., CHABAN O., GOGOL Z. Algorithm of steady processes analysis of a supply unit

of asynchronous motors _____
_____ 36

KONDRATENKO I.P., RASCHEPKIN A.P. Electromagnetic parameters of a linear inductor with

a double-layer winding _____
_____ 39

Electric power systems and installations

ZHARKIN A.F. Asymmetry analysis of non-linear using equipment of low-voltage power networks

5

4

VASYLIV K.M. Mathematical model of dynamic processes of an autonomous electric power system

on the basis of contactless asynchronized generator with a three-phase-three-phase cascade

modulated
exciter

50

Electrotechnological complexes and systems

PIVNJAK G.G., TKACHEV V.V., STADNIK N.I. Automation of homogeneous technological

installations with variable composition of functional

problems_____56

BOIKO N.I., BORTSOV A.V., SAFRONOV I.A., TUR A.N. Means of voltages and currents

measurement in installations for substances treatment by a complex of high-voltage pulse influences_____ 63

Information measuring systems in power engineering

NAKONECHNY A.Y., SAMOTIY V.V. Simulation of bandwidth signal and its correlation treatment

on the basis of low-wave conversion_____70

LEVITSKY A.S., MEL'NIK V.G. Portable instrument for express control of humidity of solid, dry

and granulated materials_____74
