

2002, □ 5

CONTENTS

S.O.LEBEDEV — Researcher, Organizer, Personality (to centenary from the birthday)_____ 3

Theoretical electrical engineering and electrophysics

ZIRKA S.E., MOROZ Yu.I. Algorithms of hysteresis simulation in magnetodynamics problems_____ 7

BARANOV M.I., KOLIUSHKO G.M., KRAVCHENKO V.I., MEDVEDEVA V.A. Electrodynamic stability

of radio-frequency coaxial cables in a zone of their ends termination to big pulse currents influence_____ 14

KUCHINSKY K.A. Temperature movements and voltages in a winding core of a turbo-generator stator __ 20

LYSJAK G.M. Nonevident multistep method of back integration formulae for investigation

of transient processes of electrical systems _____
_____ 23

Conversion of electric energy parameters

DENISOV A.I., IVANETS S.A. Prospects of application of programmable logic integrated circuits (PLIC)

in converting engineering _____
_____ 28

LYPKIVSKY K.O., HALIKOV V.A., MOZHAROVSKY A.G. Integral characteristics of a supply source

with transformerless
input _____ 32

ANDRIJCHUK V.A., VELKY V.I. Multifunctional radiation plant with computer-programmed control _____ 37

SNITKOV I.F. Quantitative estimation of electronic systems quality of executive engines control
_____ 39

Electromechanical energy conversion

SCHASTLIVY G.G., VYGOVSKY V.I., VYGOVSKY O.V., BEZPROZVANY A.O. Analysis of dynamic

heat processes of a stator winding of a powerful turbo-generator with water cooling at

defects presence _____
_____ 43

MALYAR V.S., MALYAR A.V., GLUKHIVSKY L.I., GAVDJO L.P. Mathematical simulation of stationary

modes of asynchronous motors with screened poles _____
_____ 47

TKACHUK V.L., KASHA L.V., GAIDUK V.G. Valve jet engine for motor-wheels drive _____ 50

VOITEKH O.A., ONOPRICH V.P., POPOVICH O.N., RAKITSKY L.B., GOGAEV K.O.,

NEPOMNJASCHY V.V. Computative-experimental investigations of asynchronous motors made

by a resource saving
technology _____ 56

BILYK P.D., CHUMAK V.V. Computation of frequency characteristics of asynchronous tractive

motors of cargo main line electric locomotives _____
 _____ 59

Electric power systems and installations

VAS'KO V.P. Analysis of active and reactive power generation processes by a wind-electric installation

with an asynchronous generator consisting of industrial wind-electric plants _____ 64

SHELEPETEN T.M. Inductance of windigns scattering of electromagnetic machines _____ 68

Information measuring systems in power engineering

BRAGINETS I.A. Dynamic properties and noise immunity of clamping circuits of temporary

position of pulses with tracking threshold _____
 _____ 73

LEZHOEV R.S. Capacitive hydrostatic inclinometer _____
 _____ 76

In commemoration of the 80th anniversary of F.B.Grinevich, academician of the National Academy

80

Abstracts
