

1997, No 1

CONTENTS

Shydlovsky A.K. The Ukrainian NAS Electrodynamics Institute history, its achievements and

perspectives of development

3

Kirilenko A.V. Certificating scientific brain-power is one of the key problem for the Ukrainian

NAS Electrodynamics Institute

12

Chimyyuk I.V. International cooperation of the Ukrainian NAS Electrodynamics Institute

13

Pavlova E.V. Inventian activity of the Ukrainian NAS Electrodynamics Institute

16

Mostovyak I.V. Retrospective analysis of scientific achievements and development prospects of the

department of electromagnetic energy parameters stabilization

18

Kuznetsov V.G. Optimum functioning problems of power supply systems _____
_____ 21

Chekhet E.M. Controllable electric drive of alternating current as the most efficient method of power

and resource saving

25

Yurchenko N.N. State and development tendencies of high-frequency transistor energy converters

for electrotechnological installations

31

Lypkivsky K.O. Voltage control problem of alternating current and efficient solution of its main aspects by

local technical means _____ 35

Shcherba A.A. Power supply systems for electrotechnological processes intensification of

metal working: development and prospects _____ 40

Komarov N.S. Transistor converters with high-frequency pulse modulation. Some ways

of their improvement _____
_____ 44

Emets Yu.P. Department of energy conversion _____
_____ 53

Voitek A.A. Asynchronous motors investigation in the department of electromechanical power converters

58

Schastlivy G.G. Simulation problems in power electric machines reliability _____
_____ 62

Lishchenko A.I. New electrical equipment is a basis of progress in economy_____

6

9

Avramenko V.N. Simulation of electric power systems – achievements and prospects of

scientific

investigations_____

73

Stogniy B.S. Department of electric systems automation_____

81

Grinevich F.B. Department of electric and magnetic measurements_____

85

Taranov S.G. Information measuring provision of electrical power engineering is one of the most

important scientific problems for
Ukraine_____

87

Reztsov V.F. State of investigations and prospects of renewable power sources utilization in
Ukraine_____ 90
