Electrodynamics of electrical power devices

Baranov M.1. Approximate boundary conditions for pulse electromagnetic field to the surface

of isotropic conducting
bodies_____

3

Mostovyak I.V., Novsky V.A. Equivalent circuits with ideal
two-ports_____

11

Pivovarov L.V., Lomko N.A., Pudovkina Z.Ya. Electrodynamic method of gases removal from

liquids and metal

melts _____ 13

Conversion of electric energy parameters

Pivnyak G.G., Vypanasenko S.I. Operation modes of increased frequency current electrical

installations _____
_____ 18

Fediy V.S., Sobolev V.N. Initial conditions analysis in *RLC*-circuit state with reverse commutator in

inductive circuit _____
_____ 22

Puzakov A.V., Romanets R.A., Khmelev A.J. Optimal control algorithm of decreasing voltage relay

regulator with ladder-type filter _____
_____ 26

Pyanykh B.E., Zhyvotovskiy S.A. Low-frequency modulation suppression in direct converters with

automatic control
system_____ 32

Shidlovs'ka N.A. Analysis of non-line section of a cable line

_____ 35

Oleschuk V. Direct frequency representation of converter voltage parameters for electric drive
_____ 39

Electromechanical energy conversion

Lischenko A.L., Mazurenko L.I., Elizarenko I.M., Dzura A.V. Rectifier capacitive excitation of
autonomous asynchronous
generators_____

_____ 45

Volkov A.V. Analysis of induction electric drive starting regimes with inverter frequency
converters

_____ 49

Vishtak P.A., Kondratenko I.P., Raschepkin A.P. Power parameters of three-phase cylindrical
inductors_____

55

Klement'ev A.V. EMF calculation of windings mutual and internal inductances of contactless

concurrent generator _____
 _____ 59

Electrical power systems and installations

Baranov V.L., Baranov G.L., Komarenko E.Yu. System-analog simulation of electric energy objects

by means of graph multicriterion problems solution of linear-fractional
 programming _____ 62

Muzychenko O.D. Personal and partial responsibility of receivers for electric energy quality
 worsening _____ 67

Dzvonkovsky A. Power transformers reliability in industrial installations with a seasonal
 operation _____ regime__ 73
