

1995, No 1

CONTENTS

Electrodynamics of electrical power devices

Filts R.V., Makarchuk O.V. Mathematical simulation of the electromagnetic processes in the rod of the short-circuited windin_____ 3

Gamaleja R.V., Kuedva Yu.V. Algorithms for calculation of magnetic field and stresses acting on ferromagnetic particles in the effective area of the roll electromagnetic separators_____ 8

Electric energy parameters conversion

Sinchuk O.N., Beridze T.M., Artachevich N.M. Analysis of the influence of pulse-thyristic voltage control of the tie-rod electric drives on high-frequency communication equipments_____ 13

Shidlovskaja N.A. The resonance in the circuits with the nonlinear inductance and resistive load _____ 19

Electromechanical energy conversion

Gluhivsky L.I., MalarV.S., Hi M.V. The electromagnetic parameters of the nort-

engegement biased non-explicit pole synchronous
motor _____

25

Lesnik V.A., |FarenuK A.P.,'BroAetsky I.P. Optimization of the start -mode of induction motors
in

the autonomous systems of limited
power _____

29

Chaban V.I., Dmitrishin O. Mathematical simula-tion of the electromagnetic field in the explicit-

pole electric
motors _____

3

3

Gentkovsky Z., Demenko A., Plahta B. Circuit-field analysis of the electromagnetic processes iri
an

autonomous induction generator _____
_____ 37

Vaskovsky Yu.N. The development of the numerical simulation methods for dynamic processes

in the electromechanical energy
converters _____ 47

Volchukov N.P. Scattering inductance of stator winding for multi-phase synchronous
motors _____ 50

Dzvonkovsky N. The reliability of generators for the industrial thermal power stations operating in

the seasonal mode
_____ 55

Electric energy systems and installations

Stoginyy B.S., Dentin A.E., Kuznetsov A.V. Methods and concepts of metrological supply or
current

and voltage measuring channels in the power industry

59

Kurenyy E.G., Dmitrieva E.N., Abu Siam S. State and development way of the voltage oscillation

normalizing

63

Kirilenko A.V., Butkevich A.F., Pavlovsky V.V. Expert procedures for diagnostics in the flexible control

of the power networks in an emergency

66

Kozarev N.H. An opportunity for transmission the supplementary signals over the mean

voltage air lines

73

Electrical and magnetic measurements

Hlystov V.M., Yandylyk A.S. An optimum period of the power loss telemeasurement in the power

networks _____
_____ 76

Information for authors _____
_____ 79

To the memory of Boris Pavlovich Borisov _____
_____ 80
