

1995, No 4

CONTENTS

Electrodynamics of electrical power devices

Rosov V.Yu., Zautner F.L., Piliugina O.Yu. The error in magnetic field measurements caused by the

masses of active materials closely spaced to the source _____
_____ 3

Lupikov V.S., Get'man A.V., Pelevin D.E. The greatest possible field the system of point sources _____ 8

Shekhovtsov V.I., Dubodelov V.I., Iliencko O.S., Tsin M.R. Calculation of alternative current

asymmetric distributions in the working area of magnetodynamic pump _____

12

Vishtak P.A., Kondratenko I.P., Rashchepkin A.P. Longitudinal boundary effect in linear induction machine

under changes of the conductivity of secondary body along its length_____

16

Sianov A.M. Calculation of electromagnetic parameters of inductive resistances by finite

Element method_____

21

Gladkov V.S., Dem'ianov V.V., Pashchenko A.V. The theory of current interruption in plasma interrupter,

voltage pulse charpener of nanosecond range_____

25

Nikitin Iu.V., Babich L.A., Sherman M.I. Analysis of $RC(t)$ distributed intervals_____

28

Conversion of electric energy parameters

Sokol E.1. Formation of finite duration processes in semiconducting converters by means of prognostic

MPCS _____
_____ 33

Kostin N.A. The ways of creating pulse converters for electrodeposition _____
_____ 36

Voitekha V.A., Isakov V.N. Frequency-controlled low power electric drives on the current source – self-

contained voltage inverter – asynchronous motor
system _____
39

Electromechanical energy conversion

Lishchenko A.1. Three-winding capacitor—and rectifier—excited induction generator for self-

contained power

units_____42

Asanbaev V.N., Saratov V.A. Biaxially exited synchronous turbo-generators_____45

Mazurenko A.G., Palianichenko I.K., Shulika V.A., Meleshchuk V.A. The peculiarities of the operation of

self-contained synchronous reluctance generator in pulse mode with various load feeds_____50

Martynov V.N., Oleinikov A.M. Simulation of current distribution in the mass of two-layer rotor in asynchronous motor_____54

Tverdiakov V.V., Komleva V.I. Calculation of allowable reactive power of synchronous turbo-generator with regard to the parameters found experimentally_____57

Electric energy systems and installations

Leporskii V.D., Kussul M.E., Ivanitskaia T.V., Sychev A.S. Simulation of neural classifier for the solution

prog-nostic problems in electrical power
engineering_____ 61

Denisiuk V.P. Simulation of electric load curvesby trigonometric Hermite splines
_____ 66

Minguan Liu. Evaluation of the deviation number for power lines with single-phase ground fault
_____ 70

Kozarev N.H. Resonant device for locating fault
_____ 73

Electrical and magnetic measurements

Grinevich F.B., Kaminskii V.Iu., Gnatenko L.N., Dulia V.V. Complete certification of the

processes of measurement_____
_____ 77
