

1994, □ 5-6

## CONTENTS

### Electrodynamics of electrical power devices

*Zinchenko T.R., Raschepkin A.P.* Inductor's operation in stabilized current mode \_\_\_\_\_ 3

*Minakov E.A., Mikhajlov V.M.* Flux extension from the cylinder's surface in the given magnetic field induction \_\_\_\_\_ 6

---

### Electric energy parameters conversion

*Pivovarov L. V., Borisov B.P., Maslovsky VA.* Correction methods study of linear inductor magnetic field \_\_ 9

*Mostoyyak I.V., Mostoyyak D.I.* Ideality conditions of parametric multi-ports \_\_\_\_\_ 15

*Shidlovskaya N.A.* Higher harmonics in the electric sinusoidal current circuits with the both nonlinear

resistive load and  
inductance \_\_\_\_\_ 1 8

### **Electromechanical energy conversion**

*Afonin A.A., Grebenikov V.V.* Electrodynamics systems of the increased  
fast-acting \_\_\_\_\_ 23

*Asanbayev V.N., Babyak A.A., Saratov V.A., Strikharchuk D.K.* Turbo-generators of various  
type \_\_\_\_\_ in

conditions of the thermal power stations of the  
sugar-mills \_\_\_\_\_  
30

*Chaban V.* Design principle of the parametric sensitivities model of the electric generators with

solid  
rotor \_\_\_\_\_  
\_\_\_\_\_ 33

*Klepikov V.B., Gool A.1.* Multidimensional parametric optimization of three-tuple integrating

digital-analogue electric drive systems for soundness

maximum \_\_\_\_\_  
37

*Shinkarenko V.F.* Structures directed synthesis of the electromechanical objects with travelling field

in terms of graphic data \_\_\_\_\_  
bases \_\_\_\_\_ 41

*Vaskovsky Yu.N.* Simulation algorithms of synchronous electric generators dynamic processes

in terms of electromagnetic field \_\_\_\_\_  
analysis \_\_\_\_\_ 46

*Pisanko V. V, Osadchy V. V, Adolfo Mendosa Plata.* Temperature monitoring automatization of melted

metal into electric melting unit with discrete electric drive and microprocessor control adoption  
\_\_\_\_\_ 51

*Kuchinsky K.A.* Temperature pattern distribution in solid rotors active section of turbo-motors of

12500 kWt starting power \_\_\_\_\_  
\_\_\_\_\_ 54

*Naumov V.F.* Hybrid self-excited system for the power generators \_\_\_\_\_ 59

*Stolbov B.M., Bazhanova V.A.* Sluggish energy integrator with combined functions of motor-generator and rotor-flywheel \_\_\_\_\_  
\_\_\_\_\_ 66

### **Electric energy systems and installations**

*Kens Yu.A., Zhurakhivsky A.V.* Steady-state conditions of 6-35 kV capacitor banks at inside capacitor fault \_\_\_\_\_  
\_\_\_\_\_ 72

*Levitsky V.G.* Solution procedure automatization of control and design numerical problems in energetics \_\_\_\_\_  
\_\_\_\_\_ 78

*Samoty V.V.* Ferromagnetic frequency doubler design by mathematical modelling \_\_\_\_\_  
\_\_\_\_\_ 82

*Malkov A.N., Khmelevsky P.M., Onanko A.F., Pogorely L.G.* Interferences experimental study into relay-protection channel of 750 kV high-voltage power line at short circuit \_\_\_\_\_  
\_\_\_\_\_ 85

## Electrical and magnetic measurements

*Sebko V.P., Nguen Hoang Ngy, Sirenko N.N., Nguen Lam Dong.* Parameters design of transit

eggy-current converter with flat  
plate \_\_\_\_\_ 89

*Iyuhin V.I.* Multiple constant faults localization in complex magneto-measuring  
systems \_\_\_\_\_ 93

## Index of papers for 1994
