CONTENTS

Electrodynamics of electric energy devices

Bodzyak K. Zone regulation of power in induction heating
installations_____ 3

Bolyukh V. F. Electrodynamic interaction of crio-resistive excitation winding with a circuit

connected by induction _____
_____ 6

Zamidra A. I., Demidenko S. K., Romashev L. N. Theoretical and experimental study of magnetic

systems with nonpower winding _____
_____ 12

Kildishev A. V. External magnetic field of a system consisting of ferromagnetic body and current-

conducting circuit _____
_____ 17

Batygin Yu. V. Field penetration through fine sheets in inductor systems of magnetopulse installations__ 20

Electric energy parameters conversion

Bakov Yu. V. Computation method of periodic duties of ferromagnetic-semiconductor devices

with controllable selfbiasing

26

Electromechanical energy conversion

Schastlivy G. G., Titko A. I., Stashkevich V. I. Control and prediction of nonstationary heating of

stator winding rods of turbogenerators at alternating load

31

Vdovin S. S., Zirka S. E. Transformer for constant voltage converter

36

Afonin A. A., Belyi P. N., Fursenko S. L. Investigation of armature reaction influence in linear

magnetoelectrical motors with controllable current

layer

39

Verbovoi P. F. Power indices and asynchronous engines losses in dynamic regimes of operation _____ 41

Sysoev V. S. Main engineering peculiarities of organization of small-scale production of electric

motors of 300 — 600 W power for domestic electrical engineering in conditions of operating production__ 45

Lazarev V. I., Dubinin Yu. A., Semuseva V. P., Soroka M. V. Axis ascillations of transformer

windings under the general pressing ring _____
_____ 48

Stavinsky A. A. Asynchronous motors with inside end rings and sectionalized rotor magnetic cores_____ 53

Petuhov I. S. Losses computation in a steel of pulse electromagnetic generator_____ 57

Pignasty S. S. Analysis of some schemes of electromechanical compressors of magnetic flux

with
selfexcitation _____
_____ 62

Electric energy systems and installations

Kuznelsov V. G., Lysenko A. T., Grigor'jev A. S. Minimization of the established power and optimum

control of symmetrocompensating devices
regime_____67

Udod E. J. Problems of repair efficiency increase of power installations under a voltage_____
72

Tchaban V. I. Rapid search of forced periodic duties in the problems with current wires
scientific_____75

Scientific and technical information

Sysoev V. S. Conveyer-windings accumulator_____78
