

2005 p., □ 2

CONTENTS

Theoretical electrical engineering and electrophysics

SHCHERBA A.A., PODOL'TSEV A.D., KUCHERJAVA I.N. The distribution of pulse-current density in the space between electrodes filled with metal granules _____ 3

CHABAN V. A mathematical theory of Lorentz force _____ 10

VOLOKHOV S.A. Magnetic state estimation of a ferromagnetic construction with the phase diagrams method _____ 12

Conversion of electric energy parameters

FEDIY V.S., NAMESTNIK S.G. Influence of Q(-factor) on harmonic composition of a network current

of a three-phase monoharmonic active filter _____
_____ 18

YURCHENKO M.M., SHEVCHENKO P.M., GUTSAUUK V.Ya, TVERDOKHLIB Yu.O. Commutation

processes in power modules of transistor converters of power supply systems of airborne

production equipment _____
_____ 21

KOMAROV N.S., MONZHERAN Yu.P., VOZNY V.A. Normal and emergency modes of a multiphase

pulse current controller which is loaded onto a powerful gas plasma generator _____
_____ 25

VELYKIY V.I., ANDRIJCHUK V.A. Frequency characteristics of an output stage of electronic start

controllable units (ESCU) for luminescent lamps. Normal operating
condition_____ 33

Electromechanical energy conversion

AFONIN A.A., VARDAKH M. Simulation of magnetic systems of electric motors with plane
constant

magnets in a cylindrical shape
rotor_____ 37

SHYMCHAK P. Magnetic systems of a mosaic structure of disk electric generators

with constant
magnets_____ 44

SARATOV V.A. Determination of a turbo-generator TVF-120 parameters by estimated
frequency

responses_____ 51

Electric power systems and installations

VASYLIV K.M. A mathematical model of dynamic processes of an autonomous electric power system

on the basis of a contactless asynchronized generator with a two-phase—three-phase cascade

modulated exciter

54

RAMAZANOVA Z.U., REZTSOV V.F., SURZHIK T.V., KHADZHINOV A.L. Analysis

of unsteady spatial inhomogeneous conditions in long lines at dependence of leakage current conductance

on voltage and temperature

60

SHOSTAK V.O., SOKOLOVSKY S.A., BRZHEZITSKI V.O., BELYAEV V.K., YANISCHEWSKYJ W.I.

Lightning overvoltage characteristics in a medium voltage distribution line

64

PENTEGOV I.V., LARCHENKO B.B. Analysis of processes in hexagonal autotransformer devices

of high current harmonics suppression	70
