

2000, No 2

CONTENTS

Electrodynamics of electrical power devices

FEDORENKO Yu.P. Generation of electromagnetic radiation in ionospheric plasma in the field

of an electric field standing wave_____

3

ASHUEVA T.G., KIRNOS L.A., SURZHIK T.V., SMIRNOV V.S. Electric heat instability

in a non-uniformity electric field and temperature distribution medium _____
_____ 8

KOTENEV F.O., PROHUR M.Z., JAVDOSCHUK V.E. Investigation of non-linear interactions of
electrodynamic, thermophysical and concentration patterns in composite alloys _____
_____ 11

Conversion of electric energy parameters

CHIZHENKO A.I. Electromagnetic processes analysis in a controllable valve reactive power
source with

transformer-capacitor commutation nodes _____
_____ 14

CHECHET E.M., SOBOLEV V.N., MIKHAL'SKY V.M. Commutation methods of power switches
of

multiphase matrix
converters _____ 20

PAVLOV G.V., OBRUBOV A.V., POKROVSKY M.V. External characteristics of a
series-resonant

converter with an operating frequency exceeding a resonance one _____
_____ 26

NOVQSELTSEV A.V., ZOSCHENKO A.V. General functions of compensating devices
capacitive circuits _____ 29

NOVSKY V.A., GOLUBEV V.V., POPOV A.V., SAMKOV A.V. Wide-range transformer-thyristor
converters

of an alternating voltage with a vector control for power networks with power-intensive and

non-linear
loads _____
30

NAMESTNIK S.G., FEDIY V.S., SOBOLEV V.N. Transient processes in a series RLC-circuit
with

a reversal commutator at a high commutation
frequency _____ 37

BUDNIKOV V.N. A constant current traction engine acceleration at minimum losses in an

armature
circuit _____
_____ 40

Electromechanical energy conversion

SHINKARENKO V.F. Construction principles of evolution classification of electromechanical system

structures _____
_____ 45

KONDRATENKO I.P., RASCHEPKIN A.P. Electrical parameters balancing of linear asynchronous

machines. A balanced winding synthesis _____
_____ 49

REKHENBERG K.'Influence of voltage pulsations frequency of a frequency converters on windings

insulation service life of frequency-controlled three-phase asynchronous motors _____ 56

Electrical power systems and installations

STOGNIY B.S., Sopel M.F., PILIPENKO Yu.V. Analog-to-digital conversion frequency choice at a digital

measurement and lightning and inner surges
detection_____ 59

PRIJMAK M.V. Application of weak-periodic processes for power loads
analysis_____ 62

Electrical and magnetic measurements

DUNETS B.V. Realization of virtual components of a measuring facility in the form of resident
programs_____ 66

BIDNY M.S., FRIZ M.E. Metrological characteristics of an analog-to-digital conversion of
random signals_____ 69

Discussion

MARUSCHAK Ja.Ju. Synthesis of constant current electromechanical systems regulators by
the

method of a generalized characteristic polynomial_____ 72

In commemoration of the 50th anniversary of O.V.KIRILENKO, Associate Member of the

National Academy of Sciences of Ukraine _____
_____ 78

Abstracts

_____ 79
