

1996, No 5

CONTENTS

Electrodynamics of electrical power devices

Denisjuk V.P. Electric fields simulation by trigonometric simple splines of two variables _____ 3

Rudakov V.V. Capacitor design optimizationenergy _____ 6

Balakirev V.A., Gladkov V.S., Sidel'nikov G.L. Electromagnetic pulses forming by aperture aerials _____ 9

Krikunov Yu.V. Electrical component screening of high-voltage power line field by grid screens _____
14

Conversion of electric energy parameters

Grechko E.N., Lipkovsky K.A. Construction principles of three-phase voltage regulators of modulation type

asynchronous
current _____
_____ 18

Arhiereev L.P., Kipensky A.V. Alternating voltage group converters with a sectionalized resistive load _____ 23

Gutsaljuk V. Ya. Special features of powerful transistor pulse
curr _____
29

Electromechanical energy conversion

Vishtak P.A., Kondratenko I.P., Raschepkin A.P. Influence of phase current asymmetry of linear

inductor on strip heating
uniformity _____ 33

Volkov A.V. Investigation of asynchronous motor starting regime at self-excited inverter supply
with

pulse width output voltage

control_____ 37

Bogoslavsky Yu.M., Do Ngueng Hyng. Adjusting parameters optimization of excitation controller

of' asynchronized turbo-generator in dynamic regimes on the basis of factor analysis_____ 43

Voitenko V.A., Nikolenko A.N., Shpigler L.A., Smotrov E.A. Asynchronous electric drive with vector control____ 46

Babjak A.A., Saratov V.A. Investigations of asynchronous motors damage operating in seasonal

operation conditions_____ 49

Electrical power systems and installations

Varetsky Yu.O., Zhurahivsky A.V., Kens Yu.A., Ravlik O.M, Bahor Z.M., Romanishin V.V. Subharmonic

resonance in 35 kV power
networks_____ 54

Samotiy V.V., Grytskiv Yu.I. Analysis of ferroresonance conditions of three-phase transformers

considering hysteresis_____ 59

Electrical and magnetic measurements

Doluda V.N., Zachepa Yu.A., Shishka V.V. Increase of measurements truth of external
alternating

magnetic fields of electrical equipment in industrial noise
conditions_____ 63

Volokhov S.A., Kil'dishev.A.V. Magnetic signatures of a multipole source obtained by
cross-section

measuring circuits_____ 65

Scientific and technical information

Posvyatenko E.K., Voloschenko N.M. Activities of the Highest Attestation Commission of Ukraine in the

field of electrical and power
engineering_____ 69

Volkov I.V., Lipkovsky K.O., Khalikov V.A. Special voltage stabilizers for calculative engineering
means supply__ 72

Abstracts_____ 74
