TECHNICAL ELECTRODYNAMICS 2010

CONTENTS

Theoretical electrical engineering and electrophysics

[ZOLOTARIOV V.M., SHCHERBA A.A., PODOLTSEV A.D., KUCHERIAVAJA I.N. Analysis of high-frequency processes in the cable on the voltage of 330 kW with segmented cable conductor by partial discharges inception in its insulation](#) 3

[ZYRKA S.E., MOROZ Y.I., MOROZ E.Y., TARCHUTKIN A.L. Modelling of transient processes in the transformer with consideration of the magnetic core hysteresis properties](#)

[KACZOREK T. Recent developments in the theory of fractional positive and cone linear systems](#) 20

Conversion of electric energy parameters

[PERESADA S.M., KOVBASA S.N., BOVKUNOVYCH V.S. Comparative indirect torque-flux vector control algorithms testings of asynchronous generator](#) 33

[MIKHALSKY V.M., SOBOLEV V.M., CHOPYK V.V., SHAPOVAL I.A. Definition of harmonic content and quality factors of voltage-source inverter output voltage with application of discontinuous modulation functions for the PWM](#) 41

[PRYIMAK B.I., TOKARCHUK V.V. Determination of conditions of transient function steady character of the system with modified position regulator](#) 52

Electromechanical energy conversion

VASKOVSKY Y.N., HERASKIN A.A. Mathematical modelling of electromagnetic fields in short-circuit asynchronous generators with defected rotor winding	56
ORLOVSKY I.A. Mathematical models of diesel and synchronous generator of diesel train traction electric drive on neural net	62

Electric power systems and installations

ZHURAKHIVSKY A.V., KENS Y.A., YATSEIKOA.Y., MASLIAK R.Y. Ferroresonant processes in 10 kV electrical networks with different-type voltage transformers	
--	--

Information-measuring systems in power engineering

SAVOLIUK A.M. Design peculiarities of graphic interface algorithms for low-level universal element of multiparameter measuring systems	78
To the 60th anniversary of doctor of science KHARITONOV S.A.	81
RULES of presentation of the paper	82
Abstracts	84

Institute of Electrodynamics, 2010
